Here's where to enable the capture of system audio (the sound that comes from your speakers) while making a video recording in the latest versions of Snagit on Windows and Mac. This free Mac screen recording app has a four-star rating on the Mac App store. It was designed to allow you to make and share GIF screen recordings quickly through application's server.. One drawback is that this tool doesn't record audio. Another drawback is that your recordings are limited to five minutes.. Using the All-in-One tab to capture: See guide for Win or Mac Using the Video tab to capture: See guide for Win or Mac.
